DYR LIGHTING

LUMINAIRES

DYR LIGHTING IS A BRAND
OF DIYAR KABLO FACTORY

PHONE: 533.151.1698

RAW MATERIALS

The raw materials used in production are of the first quality of polymers that are characterized by their resistance to the surrounding natural factors and their good properties, such as light weight.

Polymers used in the manufacture of light fixtures are Styrene-Acrylonitrile (S.A.N) and Acrylonitrile Butadiene Styrene (A.B.S), and in waterproof lamps the raw material is Polycarbonate (P.C).

OUR AVAILABLE DESIGNS

We have thirteen designs of light fixtures that are suitable for different people's tastes, in addition to that they are available in all colors requested by customers. Our light fixtures are packed in cartons that protect them from shocks and external factors during shipping, loading, and unloading

HISTORY OF THE BRAND

Diyar Kablo factory was established in Diyarbakir, Turkey in 2006 AD, and first it was producing electric cables, and as a result of the expansion of the factory activities production lines were introduced for light fixtures.

During the following years and until now, our light fixtures products are sold in the Turkish domestic market, as well as markets have been opened for export outside the country in the Middle East and Africa.

We have been and are still looking at customers satisfaction as a first priority, so always and forever, quality, good handling, trust and safety are our principles.
